

A MATERIAL DIFFERENCE  
*in wire and cable compounds*

# OUR MATERIAL DIFFERENCE

The wire and cable industry is a high growth marketplace. With **electrification** trends and an **increasingly connected**, global population the demand for power and telecom products is expanding rapidly.

Alongside this growth comes the introduction of stricter regulations and industry standards to **protect people** and **infrastructure**.

To help industry meet these demands we have put our **50+ years'** experience in polymer compounding into developing one of the most **comprehensive portfolios** in the market.

Working with high performance materials such as VMQ, advanced rubber technologies, additives and thermoplastic elastomers (TPE), we offer a unique position, taking a polymer neutral approach to supply you the **optimal solution** for your requirements.

**HEXPOL** is a global polymer group with 45+ production units and R&D laboratories across **Europe, Asia-Pacific** and **NAFTA**.

This international footprint and our robust supply chains allow us to **partner companies worldwide**.

## THE MOST COMPREHENSIVE PORTFOLIO

Our portfolio of advanced polymer materials means we offer a one-stop-shop to deliver the best solution for your requirements.

## THE HIGHEST LEVELS OF PRODUCT SAFETY

Industry specific knowledge, robust processes and vigorous testing are part of our daily focus on product safety.

## A GLOBAL NETWORK OF LOCAL SUPPORT

We've a multi-local footprint, giving customers support when and where they need it.

# WHAT WE OFFER

**The technical department is at the heart of what we do.**

Our scientists and application engineers lead the way in polymer research and development.

Our teams across the globe are constantly developing **new combinations**, helping create materials that are safer, more durable and more versatile.

Our portfolio includes **silicone rubber materials, CPE, EPDM, NBR+PVC, CR rubber compounds, pigment and additive masterbatch, as well as thermoplastic, TPE and TPV** technologies.

This brings an extensive list of properties and customisation possibilities and gives wire and cable manufacturers the flexibility to select the best solution for their application.

## Typical Properties Include

- HFFR
- Low smoke
- Low toxicity
- Range of hardnesses
- RoHS, SVHC and REACH compliant
- Thermal stability
- UV resistance
- Recyclability (TPE)
- Grades designed to meet international cable standards such as EN50363 or IEC 60811

## HIGH PERFORMANCE COMPOUNDS

## ADVANCED RUBBER COMPOUNDS

## ADDITIVES

## THERMOPLASTIC ELASTOMER (TPE) COMPOUNDS

# APPLICATION AREAS

Improved **fire performance** with **low toxicity**.

Our materials provide added security in areas of **high human occupancy**, where people need to be evacuated quickly and safely.

They can also be used in locations containing **expensive or sensitive equipment**. Such as hospitals, airport, train and transport hubs, communication exchanges, power generation facilities and offshore platforms.

By combining quality materials via a high-technology manufacturing process, we

deliver customised materials that help cable manufacturers exceed standards for **reliability** and **durability**.

With enhanced thermomechanical properties we have grades suitable for **telecommunication** and **electric** cables.

**Bedding, insulation** and **sheathing** materials are all part of our portfolio.

From high-to-low voltage, large marine cables to thin wires, eMobility to video, our wire and cable materials **help keep the power on and us all connected**.

## DATA CABLES

Low voltage (<1KV) cables for network infrastructure, data and control systems.

< 1KV

## LOW VOLTAGE

End user power distribution from substations.

Adjacent-to and within buildings.

< 60KV

## MEDIUM VOLTAGE

Higher voltage applications.

Transmission or distribution from substation to end users.

< 400KV

## HIGH VOLTAGE

Very high voltage applications.

Power generation to transmission substations.

# TYPICAL GRADES

Below we show typical grades to demonstrate possibilities, this does not list all available materials. We work with you to develop customised solutions. Please **contact us** to discuss your specific requirements.

| GRADE                 | CATEGORY           | OXYGEN INDEX<br>% | TENSILE STRENGTH<br>MPa | ELONGATION AT BREAK<br>% | DESCRIPTION  | DESIGNED TO MEET THE REQUIREMENTS OF THE FOLLOWING SPECIFICATIONS |
|-----------------------|--------------------|-------------------|-------------------------|--------------------------|--|---|
|                       |                    | ISO 4589-2        | ISO 37                  | ISO 37                   |  |   |
| MG9259NE70            | Silicone           | > 27              | 8                       | > 400                    | Ceramic forming silicone rubber for fire resistant cable             | EN 50363 EI2, VDE 0266 HIX1, EN 50200                             |
| MG5259NE70            | Silicone           | > 29              | 8                       | > 350                    | Enhanced ceramic forming silicone rubber for fire resistant cable    | EN 50363 EI2, VDE 0266 HIX1, NFC 32070 CR1                        |
| ALTAIR F1M12 FR       | LSZH Thermoplastic | > 38              | 12                      | > 180                    | Halogen free thermoplastic flame-retardant with hot pressure at 80°C | VDE 0207 Part 24 type HM2   |
| ALTAIR F1M12 FRH      | LSZH Thermoplastic | > 38              | 11                      | > 180                    | Halogen free thermoplastic flame-retardant with hot pressure at 90°C | VDE 0207 Part 24 type HM4   |
| HPC CM EM2 SH         | CPE                | -                 | 10                      | > 300                    | Flame-retardant CPE compound for low voltage sheathing               | UNE EN 50363-2-1 EM2  |
| HPC NPV EM2 SH        | NBR/PVC            | -                 | 10                      | > 300                    | Flame-retardant NBR/PVC compound for low voltage sheathing           | UNE EN 50363-2-1, EM2   |
| Dryflex Cable 52288 N | LSZH EVA           | > 42              | 12                      | > 150                    | Low Smoke Zero Halogen, suitable for thin wall applications          | BS 7655-6.1 LTS 3   |
| Dryflex Cable 52289 N | LSZH EVA           | > 40              | 12                      | > 200                    | Low Smoke Zero Halogen, hot pressure at 90°C                         | BS 7655-6.1 LTS 4   |

# ADDITIVE & COLOUR MASTERBATCHES

Below we show typical solutions to demonstrate possibilities, this does not list all available materials. We work with you to develop customised materials. Please **contact us** to discuss your specific requirements.

| MASTERBATCH SOLUTION                         | SUITABLE FOR                       | DOSAGE % | COLOUR CONSISTENCY (ΔE) | FORMAT                  | DESCRIPTION                                      |
|--|------------------------------------|----------|-------------------------|-------------------------|--|
| HCR Colour Masterbatch                       | VMQ                                | 1 - 2%   | < 1.0                   | LOG - Continuous String | Available in standard RAL colours or tailor-made |
| HCR Additive Masterbatch                     | VMQ                                | -        | -                       | LOG                     | Heat Stabiliser, Flame Retardant, Anti-blooming  |
| Thermoset / Thermoplastic Colour Masterbatch | EPDM, NBR, SBS, EVA, LDPE, PP, PVC | 2 - 3%   | < 1.0                   | Granules                | Available in standard RAL colours or tailor-made |

# EUROPEAN CENTRES OF EXCELLENCE

For detailed information about products and possibilities we are always here to help, please contact our specialist teams....

## **MESGO S.p.A, Gorlago, Italy**

Silicone Rubber Compounds

☎ +39 035 4252000 ✉ [info@mesgo.it](mailto:info@mesgo.it)
